Solution Architect

A day in your future job:
The ideal candidate will have a passion for designing robust, scalable, and secure solutions, with a strong focus on Azure cloud architecture. This role is split evenly between generalist solution architecture and Azure-specific responsibilities.

Solution Architecture (Generalist):
- Collaborate with stakeholders to understand business requirements and translate them into technical designs;
- Design end-to-end solutions that align with organizational goals, considering factors such as scalability, performance, and maintainability;
- Evaluate existing systems and propose enhancements or replacements where necessary;
- Provide guidance on technical integration, ensuring seamless communication between different components;
- Address cross-functional challenges related to data flow, APIs, and system interactions.

Azure Cloud Architecture:
- Work in close collaboration with the CCOE (Cloud Center Of Excellence) by leading the design and implementation of Azure-based solutions, adhering to best practices and industry standards;
- Architect cloud-native applications, considering aspects like availability, disaster recovery, and cost optimization;
- Collaborate with development teams to ensure Azure services are used effectively;
- Implement security controls, identity management, and compliance measures within Azure environments;
- Monitor and optimize Azure resources for performance and cost efficiency.

Your assets to succeed:
- Minimum of 5 years in IT architecture, with at least 5 years focused on Azure administration and solution design;
- Banking IT is a plus;
- Microsoft Certified: Azure Solutions Architect Expert (preferred) or equivalent;
- Technical Skills: Proficiency in Azure services, including virtual machines, Azure AD, Azure Storage, and networking components;

- Proficiency in diagramming tools such as Viso, archimate. Intimate knowledge of security and integration patterns, exposure to digital solutions.
- Strong understanding of architecture and design principles: this includes knowledge of design patterns, best practices, and industry standards such as TOGAF or other frameworks.
- Experience with web applications, mobile applications, enterprise applications, and data systems is essential for a solution architect. Understanding of different deployment models such as on-premise, hybrid, and cloud. Understanding of business processes and the ability to map them to technical solutions;
- Fluent in French and in English;
- Excellent communication and presentation skills. Strong analytical and critical thinking skills to evaluate the trade-offs between different solutions. Ability to collaborate effectively with cross-functional teams. Adaptability to evolving technologies and business needs.

Jump on the boat!
- Family-friendly and dynamic environment;
- Direct impact on the business, no matter your position or seniority;
- Work in an environment that encourages autonomy and entrepreneurship;
- Flexible working arrangements to help you achieve a better work-life balance;
- Variety of cultural and sporting activities during your free time;
- Inclusion and equal treatment;
- Various employee benefits & family friendly benefits.
